Amy I did a site visit in order to review this request by Eversource.

The proposed utility pole nearest the shared driveway for #4 + #6 Sunshine Avenue is problematic for two reasons, first it would have to almost abut Sunshine Ave as there is very little space between the roadway and a wooden wall/fence. Sunshine being very narrow cannot really accommodate this. Additionally the residents at #4 + #6 Sunshine have to back out of their shared driveway in order to see past the wall/fence. When doing this more than half their vehicle are already into the roadway. Adding a utility pole at that location will add three to four more feet into the roadway before they can properly see on-coming traffic entering from Oak Street.

The replacement utility pole on Oak Street to the south of Sunshine appears to be proposed in, or at a minimum, right up against the driveway entrance/exit for St. Marks Church which would create a number of risks related to sight distance and turning movements.

If I can be of any further assistance please let me know.

Respectfully,

Lt. Brian G. Lauzon
