Dear: Eversource Representative:

The safety of our employees, our customers, and the public is our top priority during the ongoing COVID-19 outbreak. Our commitment to safety, first and always, is continuous.

At the same time, Eversource must fulfill its critical mission to deliver safe, reliable service to our customers, in support of the economic health of New England and the basic needs of society.

This mission is more important than ever at this deeply unsettled time. We continue to call on our employees and contractors to perform essential work in the field that maintains and improves the reliability of our networks and serves customers' best interests, while also adapting our work practices to incorporate social distancing, heightened hygiene, and other best practices to protect their, and the public's health and avoid the spread of coronavirus.

Essential work is activity that maintains or improves the condition of our system and supports our delivery of safe and reliable energy and other services, including vegetation maintenance activities within the transmission power line corridor (right of way) on or near your property.

During this time, Eversource will follow social distancing and other health and safety guidelines in our community outreach efforts, including becoming more reliant on other forms of notifications, including letters, email and/or phone calls, instead of door hangers and in-person visits.

In accordance with the Commonwealth of Massachusetts regulations (220 CMR 22.00), Eversource is hereby providing notice of planned and scheduled vegetation maintenance work on the transmission right-of-way (ROW) that is located within your town or city limits this year.

The vegetation work will involve the cutting of tall-growing, incompatible vegetation from within the ROW. The vegetation work will be performed by qualified line clearance contractors. The work to be performed is the cutting of tall-growing incompatible vegetative species like Willow, Buckthorn, Alder and Pine that are located on your property within the ROW.

In order to ensure the safe and reliable operation of the transmission system, we are required to manage vegetation so that it does not encroach upon the energized conductors. The work noted in your area will ensure that we obtain the clearances required to prevent vegetation encroachment. This work is being scheduled for the Summer/Fall 2022.

As required by the regulations, you are being informed of this proposed work through this letter.

If you have any questions on the proposed work, please contact me at 781-441-3798.

Sincerely,

Michael Babineau
