Re: Fiscal Year 2023 Revaluation Adjustments

The following summarizes adjustments made in the revaluation process for completion and approval of our Fiscal Year 2023 assessed values.

Fiscal Year 2023 was challenging as the residential real estate market exploded while commercial and industrial property types varied in demand and thus value. Assessing is always retrospective, and as such, the date of value for fiscal year 2023 per statute is January 1st 2022. Valuations primarily focused on calendar year 2021 sales and financial statements for income-producing properties. It is important to note that calendar 2022 year sales were also reviewed with an eye on where the market was going. This summary will highlight some of the valuation adjustments made and the rationale behind the adjustments.

Residential Valuations

Residential values overall went up 10.4%. Single family homes and condominiums which make up the majority of our residential value went up 10.7% and 7.1% respectively. This was the result of an inflationary market where in 2021, on average, over 50% of single family homes sold above the original asking price. For most of the year, over 40% of properties accepted an offer within 2 weeks of listing. These statistics illustrate what a non-typical market this was. The average single family home increased from \$686,449 to \$759,265. The median single family home increased from \$621,500 to \$685,600. The median is often used in statistical analyses as it is less prone to outliers than the average. This number correlates with the 2021 median single family home price of \$735,000. Note that as of this writing, according to Banker and Tradesman Town Stats, the current January through September 2022 median sale price is \$850,000 in Natick.

Valuation adjustments included increasing land values and cost tables. Replacement cost new, a key factor in a market-adjusted cost approach, has increased in the market with the costs of lumber and supplies along with labor being the key factors. Note that while land values continue to increase, adjustments were made to depreciation tables specifically on houses deemed poor condition. As the “tear-down” market continues to be prevalent, the contributory value of the building continues to decrease. The FY23 values, based on 2021 calendar year sales, are lower than what values would be based on the 2022 calendar year sales, which may end up being considered the “peak” of this recent market.

Multi-family and mixed use properties also saw significant increases as the rental market was also driven by these market forces. Two and Three family properties went up 9% and 10.6% respectively. The apartment class, which includes smaller buildings of 4-8 units and larger, Avalon type complexes, also saw significant value appreciation with an overall increase of 16.8%. The larger apartment complex increases were based on increasing rents, low vacancies and extremely compressed capitalization rates. These type of properties became a “safe” investment, even at low returns, in the face of the variability and volatility of the Covid-19 commercial market.

Commercial and Industrial Valuations:

Town of Natick

Massachusetts

Commercial property assessments increased a minimal amount of 1.9% while industrial classified property increased 7.2%. The commercial increases were focused on property classes such as warehousing and storage. Our two industrial parks continued to see increases in assessed values as demand for industrial zoned space and flex space continues to be robust. Self-storage is another commercial property class that saw increases as this type of property's value is often tied to apartment vacancies. As apartment vacancies are low, demand for self-storage remains high as long as the market is not oversaturated. Major property types such as retail and office space have remained stable as these markets sit in limbo. Demand for these property types is stable but many owners are revitalizing properties with alternative uses in mind such as entertainment or flex and light manufacturing space.

Personal Property Valuations:

Personal property valuations increased 10.9%, from \$225 million to \$250 million despite losing some accounts in the process. However, the majority of closed accounts were small home-based businesses and other small-valued accounts. Value was gained by new businesses put on the tax rolls for the first time and additions of new property to existing accounts including high value equipment used in the lab and tech fields. The 504 class, public utilities showed increased values of over \$16 million or 12.4% while the 505 class, centrally valued telephone companies also increased a healthy 12.4%.

Conclusion:

Overall, the Town of Natick's assessed taxable values went from \$9,805,966,670 to \$10,690,746,110, a 9% increase. The valuation adjustments noted previously resulted in a shift of roughly 1% onto the Residential class. The residential portion of taxable value for fiscal year 2022 was 80.4729% and has increased to 81.5429% for fiscal year 2023. It is important to note that next year, FY24, is a Department of Revenue Certification year. While this focuses on calendar year 2022 sales, much focus will be put on impacts of the unprecedented Federal interest rate hikes undertaken this fall. As reported by Freddie Mac, the 30-year Fixed Rate Mortgage Average in the United States went from 3.11% on December 30th 2021 to 6.95 as of November 3rd, 2022. This has truly impacted buying power on the demand side for housing and has resulted in a lower quantity of sales. However, as of the time of this memo, prices had not declined locally. It is also important to note that interest rate changes affect the commercial/industrial market as the cost of money increases. It also provides investment alternatives as real estate investing comes with risk and an extended holding period. There will likely be negative impacts on capitalization rates in the future based on these rate changes as investors expect a greater return as a trade-off for these risk factors. These macro-economic issues are something that will be thoroughly analyzed moving forward to ensure that all properties continue to be assessed at fair market value.

Massachusetts

Re: Summary of FY2023 New Growth

Total new growth for the Town of Natick for Fiscal Year 2023 amounts to \$138,021,126 in value; resulting in \$1,841,201 in new tax dollars. The following details some of the larger projects and primary drivers of growth within each property class. Total real estate new growth for the year equals \$109,361,100 in value resulting in \$1,458,877 in new tax dollars. Total personal property growth for the year equals \$28,660,026 in value resulting in \$382,324 in new tax dollars.

Residential new growth was \$95,827,400 in value, accounting for roughly 88% of real estate new growth. There were thirty-eight newly constructed houses for fiscal year 2023 with an average value of \$1,376,110. In addition, 12 new condominiums were built. The 11 market rate units have an average assessed value of \$1,022,381. The Graystone subdivision, a premier subdivision in South Natick which includes single family homes and condominiums had 10 new construction units. Renovation and remodeling activity has remained robust. 21 residential projects added over \$400,000 of valuation growth each; typically, through second floor additions, large additions, and full house renovations. 22 projects each contributed between \$200,000 and \$400,000 of new valuation growth, 65 projects between \$100,000 and \$200,000, and 91 projects between \$50,000 and \$100,000. Residential growth was also buoyed by the vacant land class. This was primarily based on the expansion of the Wyndemere subdivision from 16 approved building lots to 23 building lots. Commercial and industrial growth was 13,221,200 and was primarily a result of a few small warehouse additions and renovations and conversions of existing space.

Personal property growth was highlighted by \$10,238,926 in growth within the 504 class (utilities). These new assets were valued under the hybrid approach which uses a blend of a depreciated cost approach along with a market approach to value. This approach, which has been affirmed by recent court decisions, essentially valued the new assets in amounts higher than in the past, where a standard replacement cost new less depreciation approach was used. In addition, the 505 (telephone and telegraph) and 508 (cellular and mobile wireless) classes contributed \$5,555,740 in growth. The 501 class, consisting of all non-incorporated businesses including individuals, partnerships, and LLCs, contributed \$7,707,550 in new value. This included \$2.4 million in new businesses and over \$5 million in new property added to existing accounts. The 502 class, business corporations, contributed \$5,157,810 in new growth value. The vast majority of this value was added for new assets in existing accounts.

SHIFTING THE TAX RATE
Fiscal Year 2023

I. CALCULATION OF THE MINIMUM RESIDENTIAL FACTOR - 150% Shift (formerly shown on the LA-7)

The Minimum Residential Factor is used to make sure the shift of the tax burden complies with the law ([M.G.L. c. 58, § 1A](#)). Residential and Open Space taxpayers must pay at least 65% of their full and fair cash value share of the levy. Commercial/Industrial/Personal Property taxpayers cannot pay more than 150% of their full and fair cash value share of the levy. If the calculated Minimum Residential Factor is less than 65%, a community cannot make the maximum shift and must use a Commercial/Industrial/Personal Property factor less than 150%.

A Class	B Full and Fair Cash Valuation	C Percentage Share	D Combined Res/OS, CIP
1. Residential	8,715,485,212	81.5246%	81.5246%
2. Open Space	0	0.0000%	
3. Commercial	1,671,890,188	15.6389%	18.4754%
4. Industrial	53,089,100	0.4966%	
5. Personal Property	250,147,510	2.3399%	
TOTALS	10,690,612,010	100.0000%	

The "Percentage Share" is based on the "Full and Fair Cash Valuation" of each class, which is affected by the level of assessment for each class. The level of assessment can range between 90% and 110%. This alone can cause a shift if the level of assessment for Residential and Open Space is different than the level of assessment for Commercial, Industrial and Personal Property.

Maximum Share of Levy for Commercial/Industrial/Personal Property: $150\% * 18.4754\% \text{ (Lines 3C + 4C + 5C)} = 27.7131\% \text{ (Max \% Share)}$

This calculation shows the maximum % share of the levy allowed for the full and fair cash value of the combined Commercial, Industrial and Personal Property classes (150% of the combined shares.) NOTE: Shift impact is reduced as the Max % Share decreases.

Minimum Share of Levy for Residential and Open Space: $100\% - 27.7131\% \text{ (Max \% Share)} = 72.2869\% \text{ (Min \% Share)}$

This calculation shows the minimum % share of the levy allowed for the full and fair cash value of the combined Residential and Open Space Property classes. This is computed by subtracting the Maximum Share for Industrial/Commercial/Personal Property from 100%.

Minimum Residential Factor (MRF): $72.2869\% \text{ (Min \% Share)} / 81.5246\% \text{ (Lines 1C + 2C)} = 88.6688\% \text{ (Minimum Residential Factor)}$

This calculates the Minimum Residential Factor: divide the minimum % share for Residential and Open Space by the actual % share for Residential and Open Space.

MINIMUM RESIDENTIAL FACTOR: 88.6688% Chapter 58, Section 1A mandates a minimum residential factor of not less than 65 percent

When the Minimum Residential Factor is multiplied by % share of the Residential and Open space full and fair cash value, it reduces the Residential and Open Space share to its Minimum % Share of the Levy as calculated above.

SHIFTING THE TAX RATE
Fiscal Year 2023

II. CALCULATION OF THE LOWEST POSSIBLE RESIDENTIAL FACTOR - 175% Shift (Chapter 200)

Chapter 200 of the Acts of 1988 amended M.G.L. c. 58, § 1A to allow cities and towns to give Residential property taxpayers greater tax relief by adopting a shift of the property tax burden from Residential taxpayers to the Commercial, Industrial and Personal Property taxpayers, provided certain parameters are not exceeded. Chapter 200 allows a shift of up to 75% (also known as a 175% shift) and lowers the percentage that Residential and Open Space taxpayers must raise to 50%. By expanding the shift, the tax levy on Commercial, Industrial and Personal Property taxpayers increases and the tax Levy on Residential and Open Space taxpayers decreases.

The first Section (Steps 1, 2 & 3) determines whether Residential taxpayers would raise a greater percentage of the property tax levy this fiscal year than they raised last fiscal year, if the town voted the existing law's maximum shift of 150% onto Commercial/Industrial/Personal Property taxpayers.

1. Last year's chosen RESIDENTIAL percentage* (Residential only, does not include Open Space)	80.4729%
This is last year's chosen residential percentage (RES%), not including Open Space, from form LA-5 (under the "SHIFT PERCENTS" section). (Note: The residential share in the fiscal year prior to a community's first property value certification may be used if the assessors can document that it was lower than the prior year's LA5 RES%).	
2. This year's Minimum Residential Factor using a 150% shift to CIP (from LA-7).	88.6688%
This is the "Minimum Residential Factor (MRF)" calculation in Section I above.	
3. Minimum residential share (R) in current year using 150% Shift to CIP.	72.2869%
This is the "Minimum Share of Levy for Residential" calculation in Section I above.	

If #1 is greater than #3, STOP!

You may shift only up to 150% to Commercial/Industrial/Personal Property, and line #2 remains your Minimum Residential Factor. You must stop here, because continuing would cause the Residential taxpayers to pay more this year than they did last year.

If #3 is greater than #1, go on.., continue the shift calculations. Steps 7, 8 and 9 determine whether or not Residential & Open Space taxpayers would raise a smaller percentage of the property tax levy this fiscal year than they have ever raised since the community's first certification of values, assuming the town voted a 175% shift onto Commercial/Industrial/Personal Property taxpayers as allowed by Chapter 200.

4. Calculate a Residential Factor using a 175% shift to CIP.	
This Residential Factor is the result of repeating the calculations in Steps 1 through 3 above using a shift of 175% instead of 150%. Residential and Open Space taxpayers must raise a minimum of 50%	
5. Multiply this new Residential Factor by this year's residential percentage.	
This calculation multiplies the factor in step 4 above by the combined Residential/Open Space % Share from the grid at the top.	
6. What is the Lowest Historical Residential Percentage since the first certification.	
This is the "Historic Low % " shown on the LA-5 Options & Certification form.	

If #5 is greater than #6, STOP!

You may shift up to 175% to the Commercial/Industrial/Personal Property taxpayers and step 4 is the Lowest Residential Factor.

If #6 is greater than #5, go on.

This section determines the maximum shift allowed by law, and the lowest residential factor allowable to achieve the maximum shift. These calculations will not appear if the 175% shift is not allowed according to the calculations above (If #5 is greater than #6).

7A. Take the lowest historical residential percentage (6 above).	
The residential share in the year before first certification may be used if assessors document it was lower.	
7B. Divide 7A by the current combined residential/open space percentage share (Residential & Open Space % from the grid above).	
7C. The result is the lowest residential factor allowable (it may not be less than 50%).	

SHIFTING THE TAX RATE
Fiscal Year 2023

8A. Multiply the factor from 7C by the Percent Share of the Residential & Open Space classes (from the grid above.)

This creates the new Minimum Residential & Open Space share.

8B. Subtract the new combined Residential & Open Space share from 100 to compute the new Maximum Commercial / Industrial / Personal Property percentage share.

9A. Divide this new Maximum % Share for Commercial/Industrial/Personal Property.

9B. By the Commercial/Industrial/Personal Property percent share (from the grid above).

9C. To determine the Maximum percentage of shift allowed.

The maximum percentage of shift allowed may not be more than 175%

RESIDENTIAL EXEMPTION

- The board may choose to adopt a residential exemption of up to 35% of the average value of all residential properties.
- Benefits owner-occupied properties
- Shifts the tax burden within the residential class and results in a higher tax rate
- Provides greater benefit to lower-valued properties. There is a break-even point, where an eligible/owner occupied property pays higher taxes because of the adjusted (higher) tax rate.
- Implementing a residential exemption without splitting the tax rate results in a tax rate for some residential properties higher than the CIP rate.
- In FY22, 15 communities utilized this exemption
- Most of these have a large number of rental units (Boston, Brookline) or non-owner occupied/seasonal housing (Nantucket, Provincetown)

Municipality	Res Ex Pct
Barnstable	20%
Boston	35%
Brookline	21%
Cambridge	30%
Chelsea	35%
Everett	25%
Malden	30%
Nantucket	25%
Oak Bluffs	4%
Provincetown	25%
Somerville	35%
Tisbury	18%
Truro	25%
Waltham	35%
Watertown	30%
Wellfleet	25%

RESIDENTIAL EXEMPTION

The DOR has made a change on the LA5 form to report and recalculate tax rates based optional exemptions including the Residential Exemption.

“You must upload your local exemption calculation worksheet to the LA-5 form. This worksheet should include the following required fields: parcel location/address, class, total value, exempted value and net value after exemption.”

To adopt this exemption, we need to know the residential properties that qualify. This would have meant accepting applications in July. If the SB would like to implement this policy, it would be for FY24 and can't be implemented based on a vote this evening.

As part of this process, the Assessors need to verify “principal residence” with a federal tax return. Based on our estimated percentage of owner occupancy, roughly 11,000 tax returns would need to be verified for year one. Temporary staffing would need to be utilized.

SMALL COMMERCIAL EXEMPTION

- The board may choose to adopt a small commercial exemption of up to 10%.
- Available to businesses that employ less than 10 people annually (as certified by the Department of Labor and Workforce Development) and are situated in a building that is valued less than \$1,000,000.
- All businesses at the property must qualify.
- In Natick, approximately 83 properties may be eligible.
- Benefit goes to the property owner rather than the business itself.
- Fourteen communities adopted a small commercial exemption in FY2022. Twelve also have a split tax rate.
